TOPIC: REPRODUCTIVE HEALTH

DATA FILES

Data are available in STATA (8.0) format. Data and electronic documentation are available on the MXFLS website.

Data is contained in folders, one for each household book. There are 11 folders . The folder names were assigned by the book prefix followed by the correspondent book initials. For example, in the Reproductive Health book section, Pregnancy history is in iv_he.

The modules names were assigned by using the book initials prefix followed by the section denomination. For example the section that corresponds to the cover of the reproductive health book is denominated iv_portad.

This book , Reproductive Health, has 6 sections and 8 modules. The modules are the following ones:
